

1-day Best practices of ICI Energy Management - Dollars to \$ense Workshop

In this workshop drawing from Natural Resources Canada's Dollars to \$ense training material, our experienced trainer will provide a high-level overview of energy efficiency (EE) and energy management and, most importantly, how it can benefit your organization in the short term. You will discover a straightforward, seven-step approach to energy savings which can be applied in industrial, commercial or institutional buildings. Interactive activities will help you understand and apply the concepts presented on topics such as lighting, motors, fans, pumps and more.

This workshop is a great introduction to the money saving world of EE and will help you see the opportunities that can be funded by Energy Efficiency Alberta's various programs.

Topics Covered

- Energy Fundamentals
- Seven Steps to Saving Energy
- Energy Savings Opportunities (including Lighting, Motors, Fans, Pumps, Controls, Heating, Cooling and Heat Recovery)
- Tips for Energy Savings Calculations
- Intro to Recommissioning (RCx)
- Intro to Energy Monitoring

Please note that this interactive workshop is limited to 20 participants.
