

Accelerated Energy Management - Dollars to \$ense Workshop

Since 1997, over 30,000 representatives of industrial, commercial and institutional organizations from across Canada have enrolled in the Dollars to \$ense (D2\$) energy management workshops. The D2\$ Accelerated Energy Management workshop is an opportunity to experience in a short time many of the valuable lessons that D2\$ has refined over that last 20 years!

This exciting two-day workshop is a highly hands-on and interactive experience. Facilitators will utilize a variety of physical demonstrations, calculations worksheets, graphic slides, case studies and discussion to create a highly effective learning environment. Designed for a broad audience with both technical and non-technical backgrounds – the ambitious goal of this experience is to equip participants, no matter the roles they play in managing energy, with effective approaches and tools with which to meet the challenges of energy management in 2018 and beyond.

Topics Covered

- Energy Fundamentals
- Seven Steps to Saving Energy
- Motors, Fans, Pumps Savings & VSDs
- Energy Saving Calculations
- Financial Analysis of Energy Savings
- Business Case for Energy Savings
- Strategic Energy Management
- Behaviour Change
- Analytical Tools for Energy Monitoring
- Management Systems for Energy

Each topic features a key hands-on demonstration or group activity designed to maximize learnings.

Please note that this interactive workshop is limited to 18 participants.

The learning agenda for this workshop, features ten important energy management topics ranging from organizationally strategic issues to more financial and technical aspects of managing energy.

A free 90 day trial license of RETScreen Expert is included in workshop registration and numerous take-home spreadsheet tools are provided.
