

Certified RETScreen Expert (CRE)

RETScreen Expert Software is an intelligent decision support tool to enable stakeholders to rapidly identify, assess, optimize and track the performance of clean energy investments over the entire project life cycle. The software can be used to evaluate:

- Clean energy options
- The energy production, savings and costs
- Financial viability and risk for renewable energy and energy efficiency technologies
- GHG Emission reductions
- The performance of implemented projects

This course will include tips and tricks on how to use the RETScreen Expert Clean Energy Management software to apply learnings, as well as a **free 90-day subscription to the Professional mode of RETScreen Expert.**

Training Objectives

Participants will develop their skills in the analysis of all types of energy efficiency and renewable energy technologies. Further, they will develop a sound understanding of the new analysis functions provided by the software, such as the Virtual Energy Analyzer, the Portfolio Analysis and the Combined Heat and Power (CHP) module and RETScreen Connect as well as the monitoring of energy performance data. Upon training completion, participants will be able to:

- Quickly gauge a facility's energy performance using benchmarking, and evaluate energy costs and savings, GHG reductions and financing viability;
- Determine the energy production and savings potential for any location in the world employing Archetypes;
- Verify the performance of implemented projects and find opportunities for further energy improvements;
- Manage energy across a large number of facilities and achieve energy-related investment goals using the Portfolio Analysis;
- Automate and link data sources and other software tools directly with RETScreen Expert using the RETScreen Connect advanced scripting tool.

CRE Certification

- Three 10 to 15-question quizzes
- Final 3hr-master case study using most RETScreen Expert features

Partner: *In Ontario, this program is eligible to the IESO's Training Incentive covering up to 50% of the fees. Visit the [saveONenergy website](http://saveONenergy.com) for more details.*

Who should attend?

This short thematic course is ideal for the following clientele:

- Building owners, industry managers or technical experts
- Engineering firms or professional firms specialized in energy efficiency
- ESCO employees
- Employees responsible for EE program evaluation and operation

Logistics

CEUs: 1.8

CSEP Points: 4+2 (for certification)
